COMPLETED PRODUCT ATTRIBUTE GROUPS

T-shirt Sizes	Large	$ 5.00	5 lbs
	Medium		
	Small		
	Xtra Small		
Colors	Blue		
	Green		
	Yellow		

An Attribute Group is a pre-set group of similar attributes. This can help speed up the process of entering attributes one at a time on the product creation page. These groups are generally similar attribute values grouped in a way that they can be used for multiple products with the same attribute needs.

For instance, multiple apparel products come in the same Small, Medium, Large, and Xtra Small sizes, and thus these groups can be used multiple times throughout the site.

There are fields that give you the option to set a global price increase and/or weight increase. This will allow the person to speed up the process even more when applying attribute values to a product. If all products set as 'Large' add $5.00 to the price and 5lbs. to the weight, this can be set here and the fields will be autofilled with this information. If there is an exception to these global rules, they can be overwritten in the product attribute creation panel.
